

**\$'en cal sovenir**

★ **Divisar un nombre per 10, 100 o 1 000** consistís a descalar *respectivament* caduna de sas chifras d'un, dos o tres rangs cap a drecha, en desplaçant la virgula.

Exemples :  $358 \div 10 = 35,8$  ;  $358 \div 100 = 3,58$  ;  $358 \div 1\ 000 = 0,358$

★ **Divisar un nombre per 20, 200 o 2 000** consistís a descalar *respectivament* caduna de sas chifras d'un, dos o tres rangs cap a drecha, en desplaçant la virgula, puèi a dividir la resulta per dos.

Exemples :  $168 \div 20 = 16,8 \div 2 = 8,4$  ;  $425 \div 200 = 4,25 \div 2 = 2,125$
